MIND-BODY WELLNESS TECHNOLOGIES

MLX I³DOME

Sports Recovery & Triple Detox

The Next-Gen Wellbeing Solution

Step into a new era of sports recovery, detox and wellness. A powerhouse combining three highly effective methods in one to re-charge and revitalize the body and mind: Far-infrared tech, Plasma and Light Treatment. The advanced technology targets deep tissue, promoting the removal of harmful toxins from the body. This detox process leaves you feeling re-energized and refreshed, with a noticeable improvement in overall well-being.

A game-changer for athletes, MLX i³Dome is ideal for supporting sports recovery after intense workouts, as penetrating deep tissue helps reduce inflammation and promotes muscle recovery.

The ultimate Detox

Far Infrared (FIR), Plasma & Light Treatment

MLX i³Dome integrates three highly effective detox methods into one, by combining Far Infrared technology, Plasma, and Light treatment.

Recover and re-charge your batteries

Gharieni's FIR technology, integrated into the MLX iDome, enhances metabolism and promotes perspiration through long-wave infrared rays. Meanwhile, the Plasma and Light Technology (PLT) device at the head section visibly rejuvenates the skin and supports detoxification.

The strategic combination of these three technologies maximizes effectiveness, as each enhances and amplifies the benefits of the others.

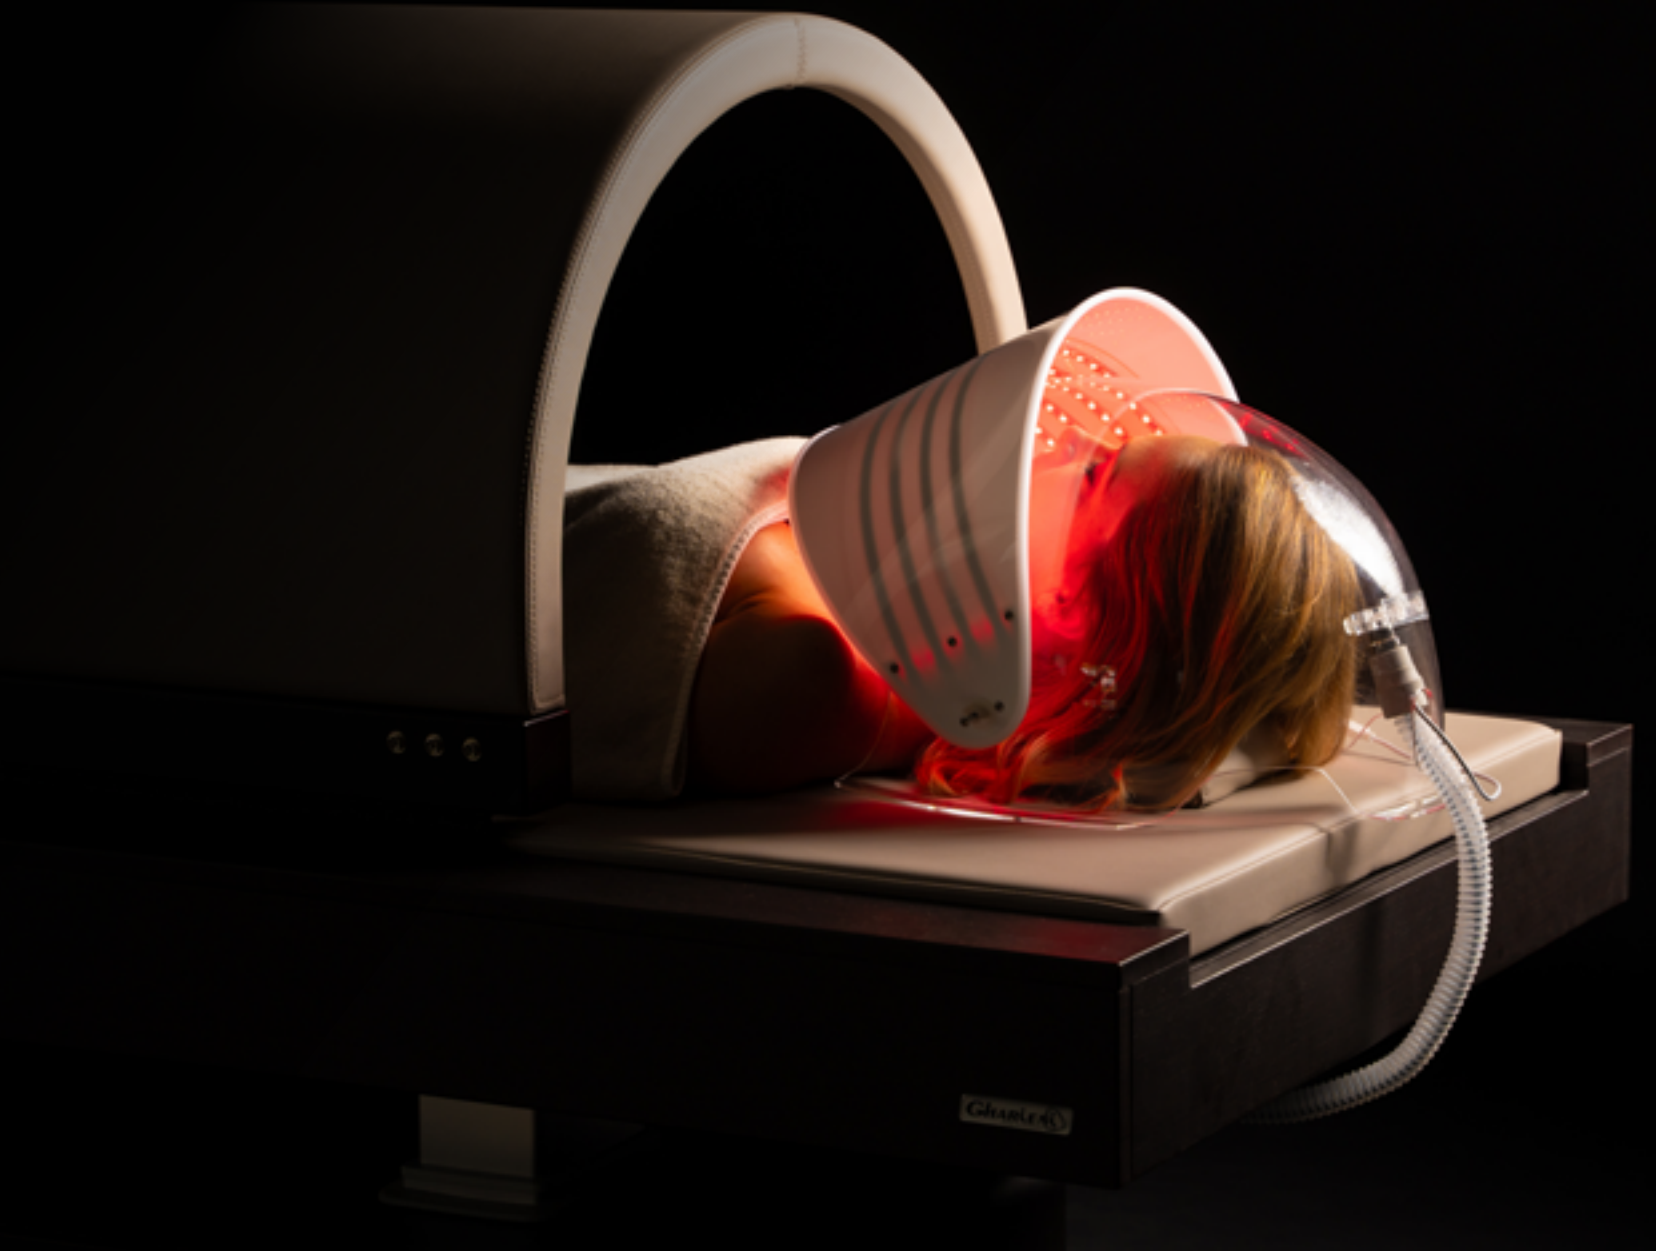

Far Infrared Treatment

Gharieni FIR technology stimulates the body with far infrared rays

First discovered by scientist Sir William Herschel in 1800, Far Infrared Rays (FIR) are the healthy rays contained in sunlight that are responsible for photosynthesis, the process used by plants to produce energy and without which, there would be no life on earth. Approximately 80% of solar energy is made up of FIR and 60% is between the range of 10-20 microns. Far Infrared Rays are invisible wavelengths of light that are longer than that of visible light.

Benefits:

- Optimize sports recovery
- Detoxification of harmful toxins from the body
- Reduce stress, anxiety and depression states
- Boost immunity and energy levels
- Mental fitness and general wellbeing

Plasma Treatment

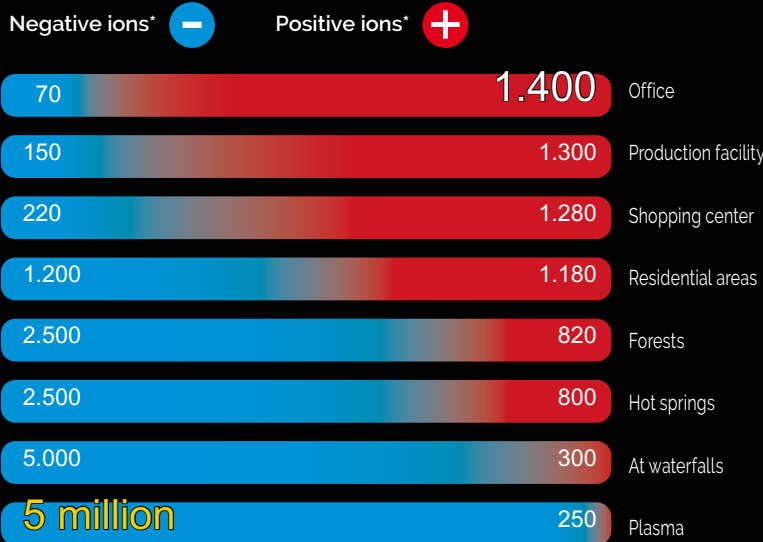

For problem-prone skin, anti-ageing and revitalization

Plasma Technology is an innovative method for cosmetic treatments. During the application, clients are exposed to the energy of oxygen (O2) in the form of applied electrically negatively charged ions. The more Negative Ions the better.

Benefits:

- Maintenance of skin health
- Visible improvement of sensitive skin
- Increase of vitality & suppleness
- Positive support of the metabolism

Please note that our PLT device is optional.

*Number of positive and negative ions per cm³

Light Treatment

Scientifically proven and effective

Each type of light therapy works at different wavelengths to target specific concerns, making it a versatile application in wellness and aesthetic treatments. The effect of the colored light is reinforced by the negative ions.

RED LIGHT (625-335 nm):

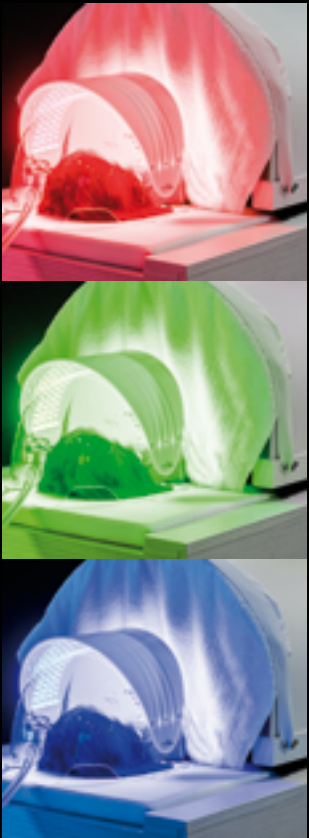

- Stimulates collagen production and enhances cellular regeneration promoting healthier and more youthful-looking skin
- Promotes increased blood flow and alleviates inflammation
- Supports mental wellbeing
- Energizes & promotes vitality

GREEN LIGHT (525-535 nm):

- Skin Brightening: targets pigmentation issues like age spots and sun damage
- May help with stress-related tension headaches.
- Supports recovery after cosmetic procedures by reducing redness and calming skin.
- Harmonious, regenerative and soothing

BLUE LIGHT (475-485 nm):

- Targets acne-causing bacteria, reducing breakouts, reduces redness and inflammation
- Helps the management of oily skin.
- Can improve alertness and focus during the day, especially in people with disrupted sleep schedules.
- Cooling, calming, quieting, and cleansing.

Specifications

TECHNICAL SPECIFICATIONS:

Height of bed surface (Electric version): 53-83 cm (20.9-32.7 in) || (Static version): 53 cm (20.9 in)

Length: 225 cm (88.6 in) || 245 cm with extensions (96.5 in)

Total width: 90 cm (35.4 in)

Width upholstery 70 cm (27.6 in)

Lifting capacity: 300 kg (660 lbs)

Load capacity: 350 kg (770 lbs)

Total weight of bed: 220 kg (485 lbs)

FEATURES:

Gharieni FIR-technology

4 zone FIR heating system (3 in Dome and 1 in lying surface) with timer & automatic off safety function

FIR-heat intensity is seperately adjustable (in both parts of the Dome and in lying surface)

Adjustable Height & Tilting (electric version only)

Easy adjustment of Dome with gas lifts

Storage compartment and two drawers in the base

headrest extension and neck support cushion

2 sets of terry cloth sheets and dome drapes

International voltages available 100-240v 50-60hz

PLT DEVICE:

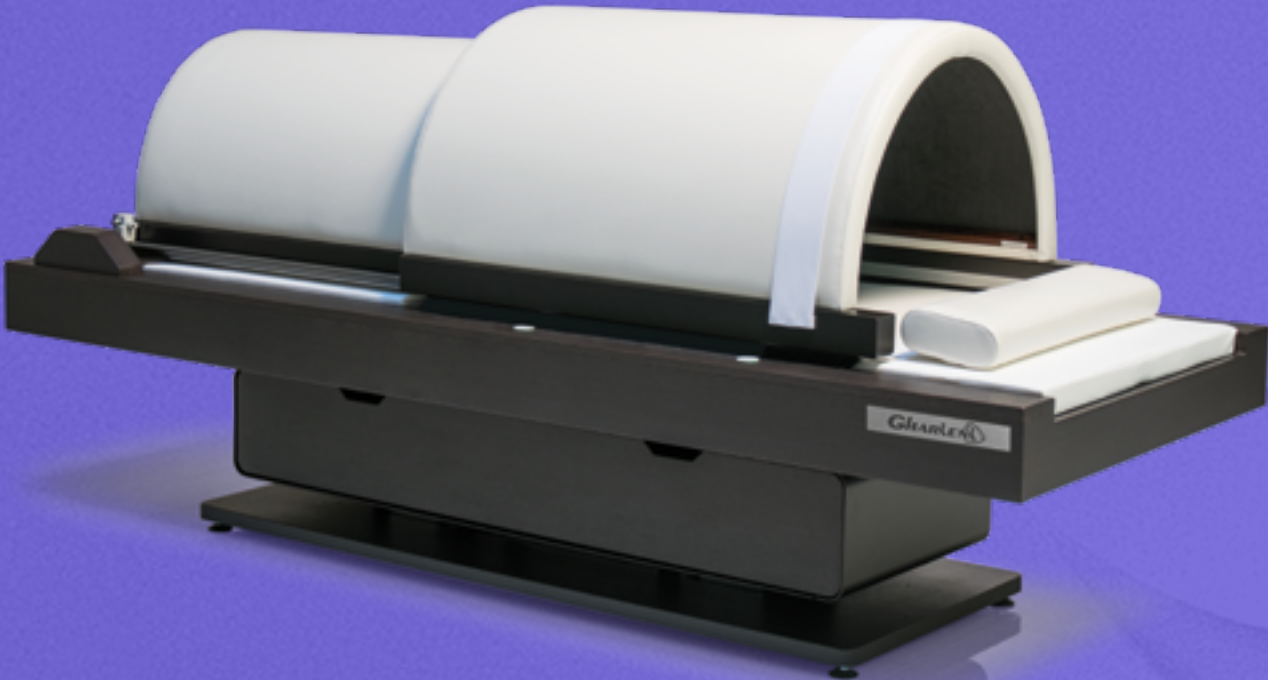

Plasma light treatment delivers up to 5 million negative ions per cm³

Light Treatment visor delivers red, green or blue light (red: 625-335 nm; green: 525-535 nm; blue: 475-485 nm)

Aromatherapy diffusor
