A Deeper Dive

A valuable asset in the medical field, in the fitness, lifestyle and spa industry, hotels, and offices, reLounge ZeroG is a groundbreaking innovation, elevating any space and the caliber of services provided within.

Combining four powerful treatment methods into one system, it features muscle training through electronic muscle stimulation (via a 12-channel stimulation matt), pain relief with TENS (transcutaneous electrical nerve stimulation) and soothing warmth up to 40°C to improve blood circulation and relax the muscles. Together, this delivers the sensation of a deep tissue massage. This not only addresses the symptoms but targets the root causes directly. With reLounge, therapeutic expertise is available at the push of a button.

Engineered for back, neck, and shoulder pain relief, reLounge ZeroG delivers results in just 20 minutes and after just one session, making it perfect for standalone sessions or integration with other offerings.

Advanced Wellness Technology for Pain Relief & Recovery

TENS Therapy

Proven low-frequency pain relief that disrupts pain signals, boosts circulation, and triggers endorphins—offering effective, drug-free relief for acute and chronic pain.

Han Stimulation

A unique blend of high- and low-frequency stimulation, clinically proven to activate nerve fibers and enhance the body's natural painkillers for long-lasting relief from neuropathic, muscle, and inflammation-related pain.

Modulated Medium Frequency

Targets deep spinal muscles essential for posture, core stability, and movement control—enhancing recovery, muscle function, and overall well-being.

EMA (Electronic Muscle Activation)

Directly stimulates muscle fibers without straining the nervous system. Ideal for rehabilitation and performance, EMA activates deep muscle layers for enhanced recovery, strength, and endurance.

Heat Therapy

Delivers targeted warmth to relax muscles, reduce stiffness, and accelerate healing.

Massage Therapy

Replicates rhythmic manual massage to relieve tension, improve circulation, and promote both physical and mental relaxation.

“It was important to us that, in addition to the relaxation effect, there is also a lasting training effect. Most of our guests are thrilled after the first treatment.”

Tammy Pahel, Carillon Miami Wellness Resort

“

“We are thrilled with the positive results and the reduction in the workload of our therapists. We save significantly more time and can help more effectively.”

Eduard Giese, Owner Physio-Sport/Plus Germany

“

Programs

Pain Therapy (Recommended 5-6 Sessions)

A personalized approach to pain management, with programs designed for **acute or chronic** conditions. Patients can choose:

- ✓ **Targeted Therapy**
A customized program specific to their condition
- ✓ **General Pain Relief**
A broader pain therapy approach, based on Han-stimulation, ideal for **sensitive patients**

Dynamic Deep Massage Therapy

A revolutionary wave-based massage system designed for deep muscle relief and relaxation.

- ✓ **The Perfect Wave (Recommended 2-3 Sessions)**
Deep muscle engagement, ideal for non-specific pain and tension.
- ✓ **The Dynamic Multi-Wave (Recommended 2-3 Sessions)**
Gentle, rhythmic stimulation, perfect for first-time users, elderly, or mobility-restricted patients.

- ✓ **Dysbalance Wave (Recommended 3-4 Sessions)**
Restores muscular balance by addressing postural asymmetries & imbalances.
- ✓ **Lindworm Wave (Recommended 2-3 Sessions)**
Mimics a dynamic, flowing sensation to target deep paravertebral muscles & relieve unilateral pain.
- ✓ **Comfort Wave (Recommended 3-4 Sessions)**
Blends TENS pain relief with muscle activation to simulate natural movement patterns.
- ✓ **Migraine & Headache Wave (Single Sessions)**
Alleviates upper back & neck tension for effective relief from headaches.
- ✓ **Muscle Relaxation Wave (Single Sessions)**
Loosens deep muscle tension while retraining muscle coordination.
- ✓ **Vitalization Wave (Recommended 1-2 Sessions)**
Stimulates the entire back musculature to improve posture, movement, & mobility.

Muscle Therapy (Recommended 4-5 Sessions)

A powerful muscle stimulation program designed to build strength and endurance, alternate between 4Hz and 50Hz for deep activation, and stimulate controlled muscle contractions for optimal function.

Use cases

MEDICAL & THERAPEUTIC

Analysis and treatment in one

Streamline your practice

Diagnose and treat back pain efficiently. reLounge ZeroG analyses the patient's baseline back situation and automatically creates a treatment plan.

20-minute treatments

Provide fast pain relief with minimal patient time commitment.

Simple billing & reimbursement

Just like any other medical service.

Attractive additional income and patient loyalty

HOTEL & HOSPITALITY

Innovate your Wellness offerings

Elevate customer experiences

Treat your customers to Wellness on the next level.
